

Palletizer ST20

The ST20 is a fully automatic palletizing machine that stacks bags quickly and firmly. Thanks to the automatic pallet input and output, production can continue to run uninterrupted. The machine can process up to 15 bags per minute and enables precise stacking, even with overlapping products. Optionally, the machine can be configured with a Dual Purpose manipulator for boxes and crates. You can set and operate the entire machine via the built-in touchscreen. Our palletizers can be configured entirely according to your wishes.
