

Palletizer ST25

The ST25 is a semi-automatic palletizer that stacks bags securely at high speed. The pallet import and export is not automated with this type. The machine can process up to 22 bags per minute and enables precise stacking, even with overlapping products. Optionally, the machine can be configured with a Dual Purpose manipulator for boxes and crates. You can set and operate the entire machine via the built-in touchscreen. Our palletizers can be configured entirely according to your wishes.
